Safety Warnings and Precautions

WARNING: When using tool, basic safety precautions should always be followed to reduce the risk of personal injury and damage to equipment.

Read all instructions before using this tool!

1. **Keep work area clean.** Cluttered areas invite injuries.
2. **Observe work area conditions.** Do not use machines or power tools in damp or wet locations. Don't expose to rain. Keep work area well lighted.
3. **Keep children away.** Children must never be allowed in the work area. Do not let them handle machines, tools, or extension cords.
4. **Store idle equipment.** When not in use, tools must be stored in a dry location to inhibit rust. Always lock up tools and keep out of reach of children.
5. **Use the right tool for the job.** Do not attempt to force a small tool or attachment to do the work of a larger industrial tool. There are certain applications for which this tool was designed. It will do the job better and more safely at the rate for which it was intended. Do not modify this tool and do not use this tool for a purpose for which it was not intended.
6. **Dress properly.** Do not wear loose clothing or jewelry as they can be caught in moving parts. Protective, electrically non-conductive clothes and non-skid footwear are recommended when working. Wear restrictive hair covering to contain long hair.
7. **Use eye protection.** Always wear ANSI approved impact safety glasses underneath a full face shield during use. Also, wear heavy duty work gloves.
8. **Do not overreach.** Keep proper footing and balance at all times. Do not reach over or across running machines.
9. **Maintain tools with care.** Keep tools sharp and clean for better and safer performance. Follow instructions for lubricating and changing accessories. The handles must be kept clean, dry, and free from oil and grease at all times.
10. **Remove adjusting keys and wrenches.** Check that keys and adjusting wrenches are removed from the tool or machine work surface before starting work.
11. **Stay alert.** Watch what you are doing, use common sense. Do not operate any tool when you are tired.
12. **Check for damaged parts.** Before using any tool, any part that appears damaged should be carefully checked to determine that it will operate properly and perform its intended function. Any part that is damaged should be replaced.
13. **Replacement parts and accessories.** When servicing, use only identical replacement parts. Use of any other parts will void the warranty. Only use accessories intended for use with this tool. Approved accessories are available from Cummins Industrial Tools.
14. **Do not operate tool if under the influence of alcohol or drugs.** Read warning labels on prescriptions to determine if your judgment or reflexes are impaired while taking drugs. If there is any doubt, do not operate the tool.

Warning: The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

How to use the Solar Light

Open the cover, push the switch to the "ON" position, replace the cover and position the light in a sunny location.

If the light does not turn on automatically after a 6 hour charge please check the following;

- 1) Check the batteries to ensure that they are making correct contact with the terminals.
- 2) Check that the lamp is placed in a sunny location and that the solar panels are facing the sun.

Replacing Batteries

If the light stops working after it has been used for a long time (approx. 18 months), the battery may be beyond its lifespan. You may open the cover of the battery to change a new set of rechargeable batteries.

Battery Specification: 1.2V 600mAh Ni-Cd battery

The lifetime of LED lamp is over 100,000 hours.
You should never need change it .

How the Solar Light Works

During the day, the solar panel converts solar power into the rechargeable battery. At night, the light turns on automatically by the stored energy. How long the light lasts depends on its location, weather conditions and seasonal lighting availability.

Choosing the Right Location

An outdoor location with direct sunshine and where the Solar Panel of your light can receive at least 6 hours of sunshine each day is an ideal location for Solar Light. Shady locations will influence the batteries charge and may shorten the working time of the light at night time. The Solar light should not be placed near lighting such as street lights, which may cause the light to turn off as there is a sensor inside to feel brightness and control the light working.

The Solar light is ideal for night time lighting of the garden, lawn, patio, walks or wherever needed. You can also charge the light/s outdoors then use as indoor illumination.

Precautions

To note that the light is designed to work when ambience turns to dark. If there are strong light sources nearby then the lamp might be very dim or not work at all.

Although the battery has been charged by the manufacturer, the electric levels will have dropped when you receive it. Please charge it for a full day to optimize performance.

The surface of the solar light must be kept clean, if not, this will influence the efficiency of charging.
